Resume Last Updated: May 2026

PROFESSIONAL SUMMARY

I began my career as a mechanical engineer by education and chance, and transitioned into software engineering by interest and passion. Over 6+ years in web development, I have focused on backend systems, API design, database modeling, and architecture decisions that scale. I work closely with teams to translate product needs into reliable systems, while also delivering clean, responsive interfaces. I take ownership from development through deployment, ensuring performance, security, and maintainability.

• Backend-first mindset with balanced frontend collaboration to deliver end-to-end solutions.
• Hands-on with deployment, monitoring, and performance tuning in production.
• Clear communicator who aligns engineering decisions with business outcomes and handles domestic and overseas clients effectively.

SKILLS

React, Livewire, vue, Node.js, Laravel, core Php, MySQL, PostgreSQL, MongoDB, Docker, AWS, CI/CD, Nginx, codex, cursor, playwright
